“Unconventional” as convention.

I’m an experienced composer with a passion for new technologies and workflows. I work well in teams and slot easily into a broad range of roles, from leading a team to providing AV support, programming, and (off course) creating music. I enjoy applying myself to new, challenging environments. When I take on a new task, I don’t just complete it but make active efforts to learn more about such tasks. That way, I’m constantly developing!
